Custom Corner

TUMI offers a full range of customization options:

- **LASER ENGRAVING:**
Laser engraving is used to etch a logo or design into a metal or plastic service. The small size of the beam lends itself in producing highly detailed logos or designs.
- **DEBOSSING:**
In debossing, an image is pressed into the surface of the item creating depressions rather than raised impressions. Each piece is individually hand done. This process presses a die under intense heat into the material leaving a depressed imprint of the design, logo, or initials. It is very similar to hotstamping, without the foil. Instead of having a logo stamped onto the material, the debossed logo is pressed into the material. It will never peel or flake off, it is a permanent impression.
- **HOTSTAMPING:**
Hotstamping involves pressing a heated metal die against a colored foil on top of the product to be printed. Where the raised surface of the die meets the foil and product being stamped, the foil graphic is permanently transferred to product. So your corporate logo or name is imprinted on the product or material using gold, silver or various color choices of foils.
- **MONOGRAMMING:**
Personalize your TUMI product with a monogram. This is another commonly used term for applying a Personal Name or Initials on an item with the methods of debossing or hotstamping. Monogramming is a great way to make an item uniquely yours, or to make a gift extra-special.
- **EMBROIDERY:**
Before a logo or design is embroidered, it has to be digitized. Digitization is the process by which a logo or design is translated into instructions which tell the embroidery machine what to stitch on an item. This is a fairly complex process which requires a one-time setup charge.
